

DATA DISCLAIMER

Quotes created by Energy Matters (including those shown online, in proposals and those emailed directly to you) contain information, data, graphs and images (**Data**) relating to the performance of solar systems at your premises.

The Data relates to the performance of a chosen solar system in optimal conditions and is based on a 15 year set of irradiation and temperature data. The actual performance of the solar system will vary from the optimum performance described in the Data. This is because yearly weather patterns will vary and because optimum conditions do not take into account variables such as the layout and design of your premises, the position and orientation of the solar system, prevailing weather conditions and the build-up of dust and debris over time or things that may project a shadow onto the panels.

The Data has been formulated with all due care. However, you are responsible for making your own assessment of the Data and should make your own enquiries as to the actual performance of a solar system at your premises.

Changes in circumstances which occur after the time of publication of the Data may impact on the accuracy of the Data. Energy Matters reserves the right to change the Data at any time without notice.

Our goods and services come with guarantees that cannot be excluded under Australian Consumer Law. Other than as required under Australian Consumer Law, Energy Matters does not warrant the quality, accuracy, reliability, completeness or fitness for purpose of the Data and will not be liable to you for any losses, expenses, damages (including indirect, special, incidental or consequential damages) or claims in relation to the Data.

Energy Matters means SunEdison Australia Pty Ltd ACN 118 108 044 (trading as Energy Matters) and any of its related entities.
